Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 2, 4 and 9-12 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6413372. The effective filing date of the material of example 1 being 20 April 1999.

The reference teaches a composition for papermaking, see Table 1, comprising a combination of cationic waxy maize starch and anionic waxy maize starch in powder form, which is then dispersed in water. The low zeta potential shown (e.g. +1.1mV) indicates a slight anionic demand of less than 100 ueq/L. This invention is anticipated by claims 1, 2, and 14 of the patent. The zeta potential explicitly disclosed of +20 to +1mV indicates a slight anionic demand of less than 100ueq/L.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6413372, as applied above in view of WO 99/64677.

Art Unit: 1755

The difference between claim 3 and the prior art cited is the starch derivative used as the anionic starch. WO 99/64677 teaches that starch phosphate and maleic or succinic anhydride modified starches function equivalently in papermaking compositions. See page 7, lines 28-32. It would have been obvious to one of ordinary skill in the art to substitute the maleic or succinic anhydride modified starches for the starch phosphate of the primary reference because they are shown to be art-recognized equivalents.

An affidavit or declaration under 37 CFR 1.131 is ineffective to overcome a rejection over a non-commonly owned US Patent claiming the same patentable invention. Applicant remedy must be under 1.608(b). 1.601(n) sets forth the definition of "same patentable invention" is the same as that with respect to 35 U.S.C. §102 or §103. The "same patentable invention" is not required to be of the same statutory class.

This is a request for continued examination of applicant's earlier Application No. 09/884420. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1755

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
